

Get A Better Relationship

2J Lau Ka Man

Father, mother, sister
If sister has a disaster
Mother need to look after
Father should work harder
Family happy together
Share with each other

Chat freely
Play randomly
Share secret honestly
Friendship keeps happily
Everyone is lovely
You will never feel lonely

No matter it's sunny, cloudy, or rainy
Let's have fun really
Friends and Family
Please get ready!

CHICKEN SOUP FOR TEENAGE SOULS

Teacher's feedback: Miss Sze

The poem reminds me of the famous book - Chicken Soup for Teenage Souls. It's an awesome poem! It's simple, direct and meaningful. She cleverly made connections and showed relationships between family and friends in this poem.

a B c D.....

2M Cheung Pui Man

When I was in kindergarten

I have learnt

A for ant, B for boy

C for cat and D for dog

When I was in primary

I have learnt

A for apple, B for banana

C for citrus and D for durian

When I was in secondary

I have learnt

A for appearance, B for brutality

C for colonies and D for dilemma

When one day, I am at university

I will learn

A for abasement, B for baboonery

C for cabbageworm and D for dactyloscopy

Teacher's feedback: Miss Wong

Cindy's poem is very interesting and creative! I wonder where she got to learn the words - abasement, baboonery, cabbageworm and dactyloscopy. I hope she can continue to learn difficult vocabulary and become an lexicologist.

Our Lover

2J Lee Pui Shan

Our Lover

Air land
 Sound water
 Look! Before is much better.
 Grass flower butterfly
 Birds fly up to the sky
 Waterfall is -
 Going by

Now! Pollution is everywhere
 People using plastic bags
 Talk loudly never goes to bed
 Limpid water is getting less
 Dirty air is really bad

E_arth is our lover

E_arth is our home

P_rotect the environment

P_rotect our home

CHINA ENVIRONMENT

Teacher's feedback: Mr. C. C. Chan

It's splendid to see Earth as our lover. Let the Nature embrace us and we should establish an intimate relationship with her.

The Season Changes

2M Lau Wang Long

The season changes

The season changes to spring
the birds come out to sing
but they cannot open their wings
because it always rains

The season changes to summer
The weather becomes hotter
every one talks to me louder
because of the air-conditioner

The season changes to fall
the leaves drop to the floor
the trees begin to sleep
and school interrupts our summer sleep

The season changes to winter
we become fatter, not thinner
May I have some hot water?
and I think I also need a heater

Teacher's feedback: Miss Sze

It's a lovely poem! Londie gave a new perspective on different seasons, and developed a fresh approach to writing, with an emphasis on reality and attention to details.

Londie's poem

The Environment Kills

2P Wong Chun Pong

The environment kills
Every eagle is ill
They need to take pills
And if they could write
They could write their wills

The environment is dirty
Humans have a duty
From Causeway Bay to Admiralty
To improve the air quality
Sweep the streets immediately

The environment almost dies
All animals cry
Their eyes might become blind
No birds want to fly
No more wings in the sky

The environment kills
All the people are ill

2P WONG CHUN PONG

Teacher's feedback: Mr. C. C. Chan

*The environment, the animals and the people are definitely in a very critical situation.
Let's not be the killers. Be the environment curers!*

空

Step up! Step up!

2J Lai Pui Ying

Step up! Step up!
Always always look forward
Never never think backward

Step up! Step up!
Let things make us satisfied
Make things become simplified

Step up! Step up!
Future is the greatest hope
We don't need to ask the pope

Step up! Step up!
Don't cry for your falling down
Nothing is able to bring us down

Step up! Step up!
Nothing sad appears hardly
Anything but ordinary

Teacher's feedback: Miss Tang

*The tone of the poem is determined that we have to “step up” and “look forward”.
Good use of repetition and rhyme to convey the meaning and express the emotion.*

Save The World

2J Wong Chun Hei

Greenhouse effect

Let's see the fact

Greenhouse effect

What does it affect?

Global warming,

What are you doing?

The world is becoming bad

Don't just sleep on the bed

Save the world

Do some work

Reduce CO₂

No more plastic bags, too

GREENHOUSE

Teacher's feedback: Miss Wong

It's a very meaningful poem! Victor tried to raise public awareness of global warming and greenhouse effect. Most importantly, he is calling for action and gives us tips on how to protect our environment.

Pay Attention

2J Fok Man Yi

The US President should be a mummy

The smokers should be a dummy

They both make me feel dizzy

Hey! What's up buddy?

People shouldn't be talking without speaking

People shouldn't be listening without hearing

Witches should drink coke

Children's shouldn't make any joke

.No more gross

No more cross

The students don't need to go to school

They just need to go to the pool

Hey, everyone come take a look!

The library has now got one more book

Teacher's feedback: Miss Tang

Yoyo expresses lots of ideas by making comparisons and using modal verbs. It seems that she is talking to the readers, and so the readers can respond to her directly. It's a good try!

Mathematics: Sudoku Mania

Yip Chun Hong, Tse Kin Fai (1 Jupiter)

Have you ever seen a set of 9×9 square like this? This is a square for putting Sudoku in. Sudoku is a new game of numbers. A lot of people know how to play Sudoku, but a lot of people still don't. Here is how to play it.

There are different kinds of Sudoku like Killer Sudoku, Super Sudoku and Monster Sudoku. They are nearly the same with Sudoku, but with slightly different rules.

Sudoku requests you to fill in the blanks with numbers. 1-9 should be filled in each row, column and 3×3 boxes. There should not be any repeated number in each row, column and 3×3 boxes

Killer Sudoku requires you to fill in the blanks with 1-9. Each row, column and 3×3 boxes shouldn't have any repeats. Also, it requires that the sum of the number inside the fixed shape to be equal to the number on the top left corner.

Super Sudoku requests the players to fill in the blanks with number 1-9. There should not be any repeated number in each row, column, 3×3 boxes and also the two lines linking the two corners.

Monster Sudoku is a hexadecimal Sudoku, it is made up of the numbers 1-9 and also A-F. Players need to fill in the 16×16 blanks with the numbers and the letters above. The numbers and letters should not be repeated in each row, column and 4×4 box.

How can we solve the Sudoku faster??

	3							9
		1		3	5		2	
			6			4		8
2				4				
3			5					4
7			1					2
5	8			6		4		
	7		4	2		3		
1		3						6

The first step:

The first step is to solve Sudoku by crossing out the squares that are impossible to be filled in with a particular number, so that we will get the correct box to fill in the specific number. You can see there is a 4 in the third row of the seventh column (7, 3) and the fifth row of the ninth column (9, 5), so there shouldn't be 4 on the seventh column and the ninth column.

Therefore, the number 4 should be on (8, 7). Using the same method, you can find out all the numbers inside the circle on the left picture and after that, you can carry on the second step to find out the answer.

The second step:

	3			4				9
4		1		3	5		2	6
			6			4		3
2				4			3	8
3				5				4
7		4	1		3			2
5	2	8	3	7	6	9	4	1
	7		4	2	1	3	8	5
1	4	3	5			2	6	7

The second step is to solve the Sudoku by checking the whole column and row. After we use this method, we may need to return to the first step to keep on solving the Sudoku. For using this method, we must find out a line with at most 4 letters missing. Then we need to find out the numbers that are missing and cross out the wrong box for putting the numbers. Finally you will get the correct place for putting in the correct number. After this step, you may still
