School Facilities

□ We have a millennium school campus of about 7,000 square metres. With the

school-wide optical fibre network, wireless network and 532 UTP network points, all classrooms, science laboratories and special rooms are connected to the Internet and equipped with computers, projectors, visualizers, DVD players and TV boxes to facilitate teaching and learning with information technology.

□ The Biotechnology laboratory, Integrated Science laboratory, Physics laboratory, Chemistry laboratory, Biology laboratory, Geography room, Home Economics room and Innovative Cookery room offer a better learning environment for experiments and practical lessons.

□ The School Library provides opportunities for students to conduct information technology to

navigate for information and create knowledge independently and collaboratively.

□ The Campus TV studio can provide students with an opportunity to experience the operational procedures of a television company. This can help strengthen their language skills, collaboration skills, critical thinking skills and life-long learning skills.

□ The 3 computer rooms in our school contain 120 computers in total. All rooms are equipped with Multi-Media Learning Centre (MMLC) facilities and available for students to use after school every day.

□ The Lecture Theatre can accommodate more than 80 persons to hold lectures or video conferences.
